

# Introduction to Developing Power BI Embedding

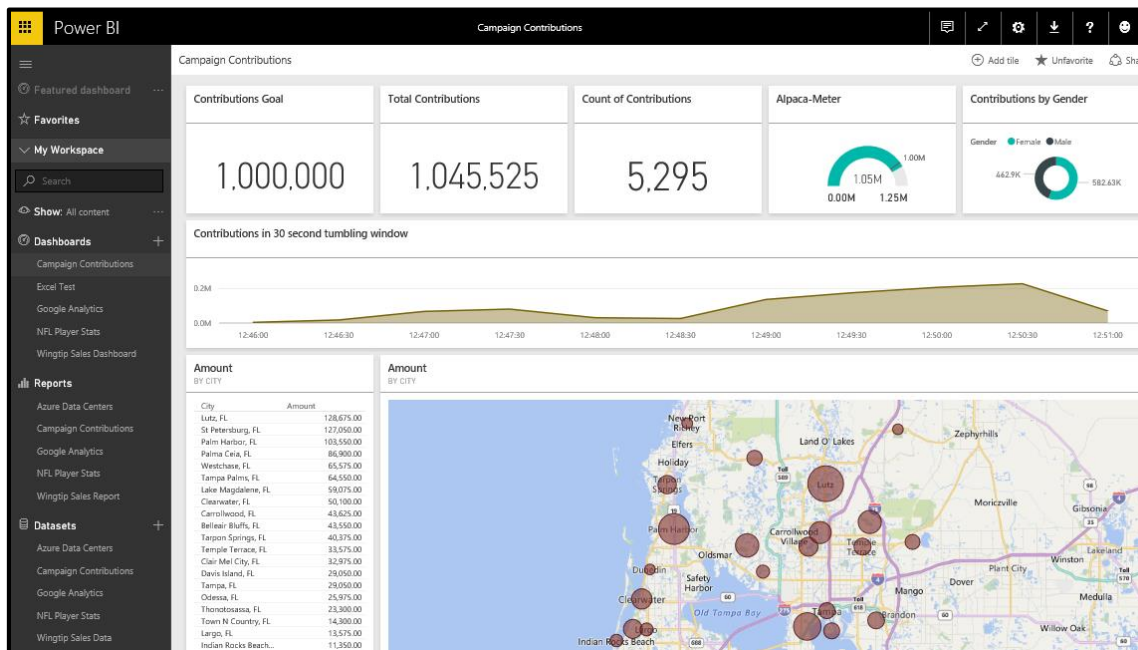

# Agenda

- Power BI Embedding Fundamentals
- Understanding Workspaces and Capacities
- Setting Up a Development Environment

# The Power BI Service – Who Is It For?

- Provides SaaS service used by web and mobile users
  - Power BI portal accessible to browsers at <https://app.powerbi.com>
  - Power BI mobile accessible to users on mobile phones & devices
- Provides PaaS service used by software developers
  - Power BI Service API accessible at <https://api.powerbi.com>

# Power BI Embedding – The Big Picture

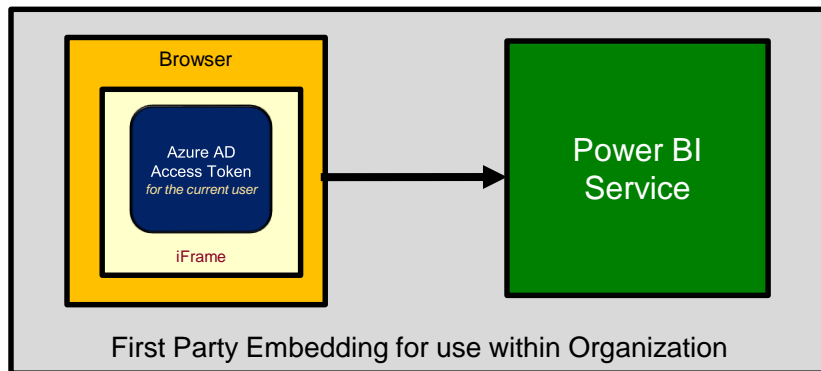

- User launches your app using a browser
- App authenticates with Azure Active Directory and obtains access token
- App uses access token to call to Power BI Service API
- App retrieves data for embedded resource and passes it to browser.
- Client-side code uses Power BI JavaScript API to create embedded resource
- Embedded resource session created between browser and Power BI service

# First Party Embedding vs Third Party Embedding

## First Party Embedding

- Known as **User-Owns-Data** Model
- All users require a Power BI license
- Useful in corporate environments
- App authenticates as current user
- Your code runs with user's permissions
- User's access token passed to browser

## Third Party Embedding

- Known as **App-Owns-Data** Model
- No users require Power BI license
- Useful for commercial applications
- App authenticates with master user account
- Your code runs with admin permissions
- Embed token passed to browser

# Embeddable Resources

- Reports
- Dashboards
- Dashboard Tiles
- New Reports
- Q&A Experience
- Visuals in custom layout

**DEMO**

**Embeddable Resources**

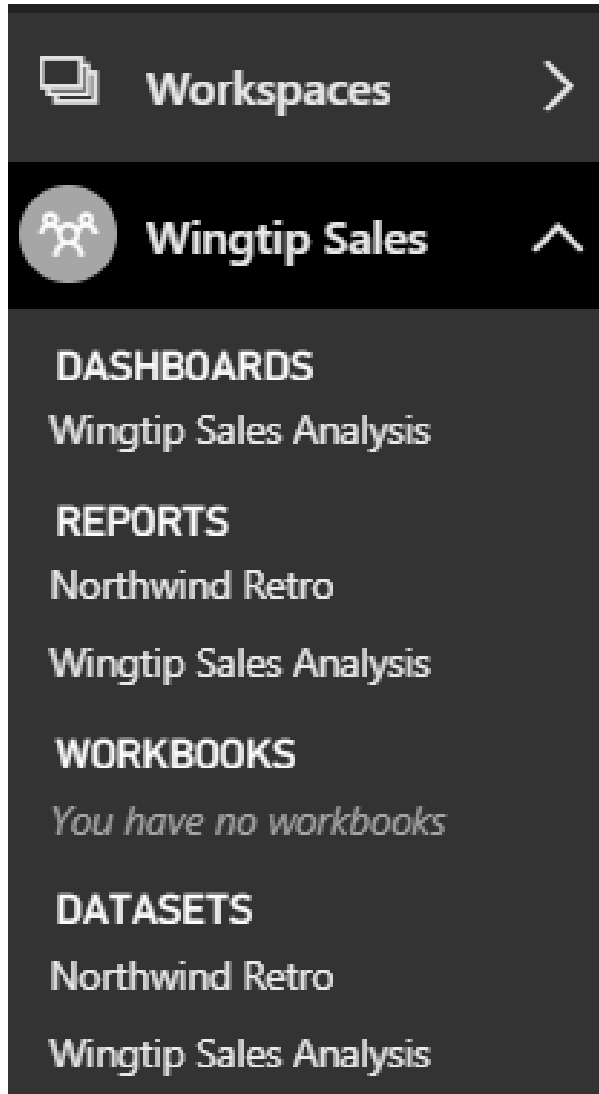

# Agenda

- ✓ Power BI Embedding Fundamentals
- Understanding Workspaces and Capacities
  - Setting Up a Development Environment

# Central Power BI Concepts

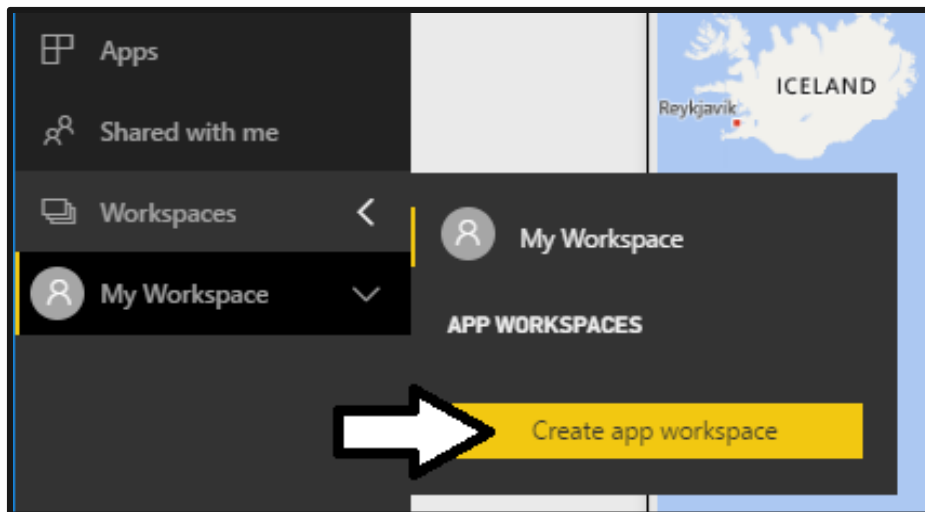

- **Workspace**
  - Secure container for publishing content
  - Every licensed user gets a personal workspace
  - App workspaces created for custom solutions
- **Dashboard**
  - Consolidated view into reports and datasets
  - Custom solution entry point for mobile users
- **Report**
  - Collection of pages with tables & visualizations
  - Provides interactive control of filtering
- **Dataset**
  - Data model containing one or more tables
  - Can be very simple or very complex

# Creating App Workspaces

- Power BI content published in app workspaces
  - Power BI Pro license required to author content in app workspace
  - Datasets & reports created by publishing PBIX project files
  - Dashboards must be created by hand

A screenshot of the 'Create an app workspace' form. The form has the following fields and options:

- Name your workspace:** A text input field containing 'Ted Pattison'.
- Workspace ID:** A text input field containing 'tedpattison'.
- Available:** A checkbox that is checked.
- Private - Only approved members can see what's inside:** A dropdown menu.
- Members can edit Power BI content:** A dropdown menu.
- Add workspace members:** A section with a text input field for 'Enter email addresses' and an 'Add' button.
- Advanced:** A section with a dropdown menu.
- Buttons:** 'Save' and 'Cancel' buttons at the bottom right.

# Power BI App Workspaces - V2

- Power BI is transition between workspace models
  - V2 app workspaces are currently in preview
  - Microsoft will soon force the migration from V1 to V2
- V1 workspaces built on top of Office 365 groups
  - Largely managed in Office 365 admin not Power BI
- V2 workspaces independent of Office 365 groups
  - Fully managed within Power BI admin portal
  - Provides more flexibility in assigning members

# Power BI Desktop Projects and PBIX Files

- Power BI Desktop projects saved using PBIX files
  - PBIX file contains data source definitions
  - PBIX file contains query definitions
  - PBIX file contains data imported from queries
  - PBIX file contains exactly one data model definition
  - PBIX file contains exactly one report
  - PBIX file never contains data source credentials

- PBIX files can be tracked in source control (e.g. github.com)
  - PBIX files is a versioned unit of work with 1 dataset and 1 report
  - Some Power BI resources (e.g. Dashboard) have no backing file support

# Working with Power BI Desktop

- Power BI Desktop focuses on first four phases
  - Query features for Data Discovery and ETL
  - Data modeling features and DAX language for building data model
  - Report design features for building interactive report
  - No support for building dashboards
  - No support for packaging an entire solution

# Division of Labor with Power BI Embedding

- Content Management Team

- Build Power BI Desktop projects
- Publish reports & datasets via PBIX files
- Create dashboards in PBI Service
- Publish App Workspaces as Apps
- Monitor Power BI environment

- Application Development Team

- Develop web apps with PBI embedding
- Authenticate with Azure Active Directory
- Retrieve data using Power BI Service API
- Embed resources using Power BI JavaScript API
- This team sees PBIX files as black boxes

# Capacities and Workspace Associations

- Every Power BI workspace runs in the context of a capacity
  - By default, app workspaces and personal workspace run in **shared capacity**
  - Organizations have the option of purchasing **dedicated capacities**

# Dedicated Capacities

- Power BI workspaces run in one of two possible environments
  - Shared capacity
  - Dedicated capacity
- Dedicated capacity required for third party embedding
  - You pay Microsoft capacity-based fee for processors cores and RAM
  - No need to pay Microsoft for user licensing
- Dedicated capacity can optionally be used for first party embedding
  - Allows users to run with free license instead of Power BI Pro license (\$10/month)
- Dedicated capacities come in two flavors
  - Power BI Premium capacities purchased through Office 365
  - Power BI Embedded capacities purchased through Azure SKU

# Power BI Licensing Though Office 365

## User-based licensing

<p>Power BI (free)</p> <p>\$0.00 user/month</p> <p>A cloud-based business analytics service that enables anyone to visualize and analyze data with greater speed, efficiency, and understanding. It ...</p> <p>Office 2016 desktop &amp; mobile apps Not included</p> <p>Office 365 services </p> <p>...</p>	<p>Power BI Pro</p> <p>\$9.99 user/month</p> <p>A cloud-based business analytics service that enables anyone to visualize and analyze data with greater speed, efficiency, and understanding. Power BI ...</p> <p>Office 2016 desktop &amp; mobile apps Not included</p> <p>Office 365 services </p> <p>...</p>	<p>Office 365 Enterprise E5</p> <p>\$35.00 user/month</p> <p>The Office suite, plus email, instant messaging, HD video conferencing, 1 TB personal file storage and sharing, and advanced security, analytics and PSTN ...</p> <p>Office 2016 desktop &amp; mobile apps </p> <p>Office 365 services </p> <p>...</p>
---	--	---

## Capacity-based Licensing

<p>Power BI Premium P1</p> <p>\$4,995.00 instance/month</p> <p>Power BI capacity dedicated to your organization, unlocking unlimited content distribution and dependable performance. P1 offers 8 virtual cores ...</p> <p>Office 2016 desktop &amp; mobile apps Not included</p> <p>Office 365 services </p> <p>...</p>	<p>Power BI Premium P2</p> <p>\$9,995.00 instance/month</p> <p>Power BI capacity dedicated to your organization, unlocking unlimited content distribution and dependable performance. P2 offers 16 virtual cores ...</p> <p>Office 2016 desktop &amp; mobile apps Not included</p> <p>Office 365 services </p> <p>...</p>	<p>Power BI Premium P3</p> <p>\$19,995.00 instance/month</p> <p>Power BI capacity dedicated to your organization, unlocking unlimited content distribution and dependable performance. ---	--	---	---	--	--

# Premium Capacity Nodes

- Power BI Premium Purchased using Nodes
  - Node type defines v-core and RAM capabilities
  - P nodes for Power BI portal deployments and embedded deployments
  - EM nodes only used for embedded deployments

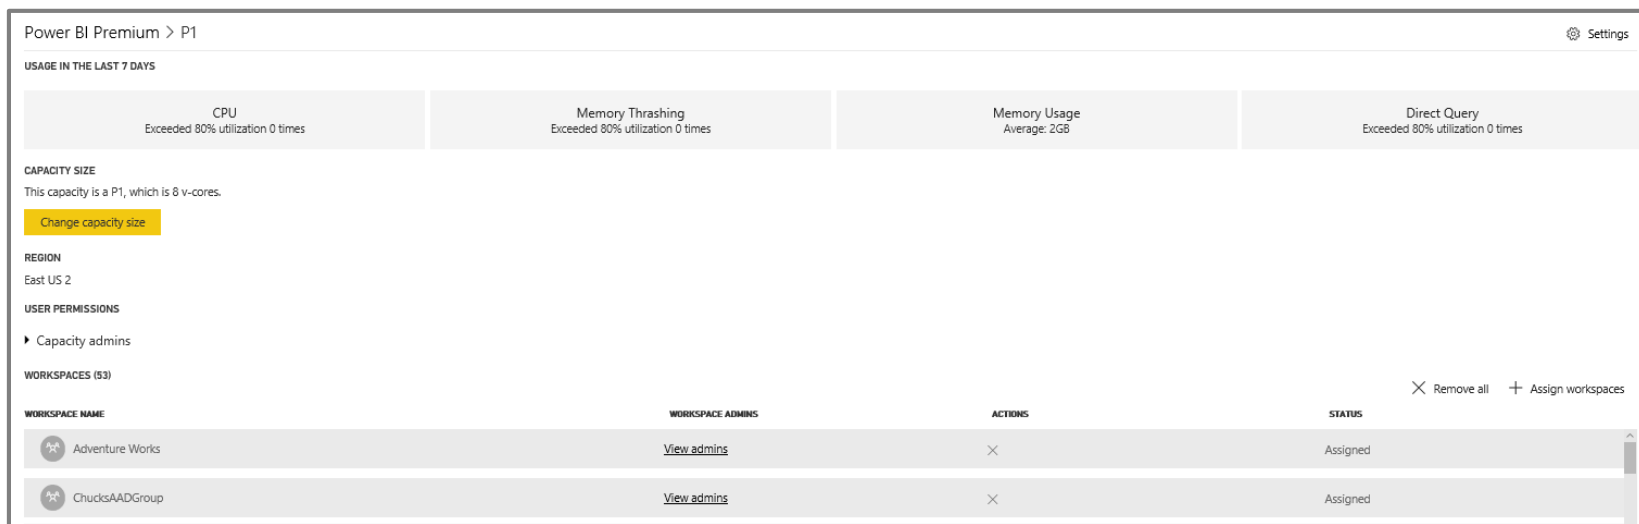

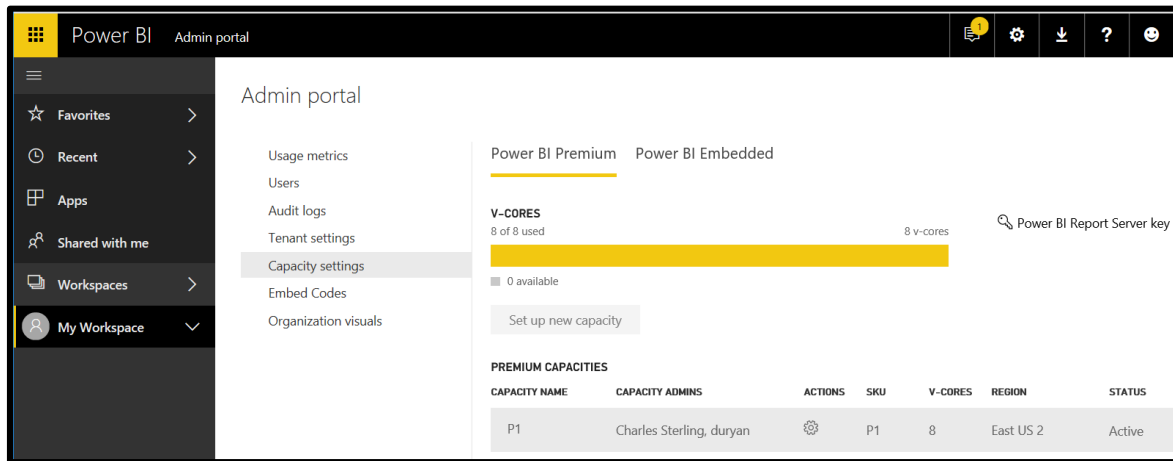

Capacity Node	Total cores	Backend Cores	Frontend Cores	Direct Query Limits	Page renders/hour
EM1	1 v-cores	.5 cores, 3GB RAM	.5 cores		1-300
EM2	2 v-cores	1 core, 5GB RAM	1 core		301-600
EM3	4 v-cores	2 cores, 10GB RAM	2 cores		601-1,200
P1	8 v-cores	4 cores, 25GB RAM	4 cores	30 per second	1,201-2,400
P2	16 v-cores	8 cores, 50GB RAM	8 cores	60 per second	2,401-4,800
P3	32 v-cores	16 cores, 100GB RAM	16 cores	120 per second	4,801-9600
P4	64 v-cores	32 cores, 200GB RAM	32 cores	240 per second	9601-19,200
P5	128 v-cores	64 cores 400GB	64	480 per second	19,201- 38,400

# Managing Premium Capacities

- Dedicated capacities managed in Power BI Admin portal

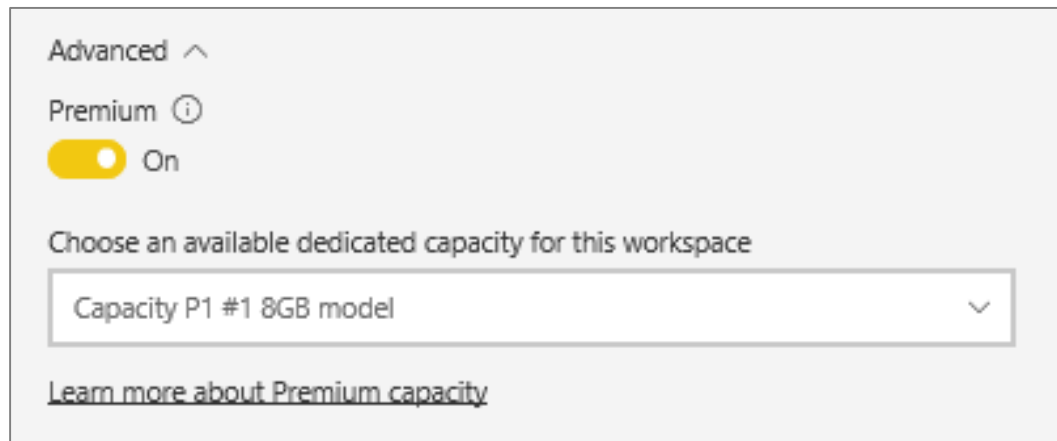

# Associating App Workspaces with a Capacity

- App Workspace in Premium Capacity has diamond icon

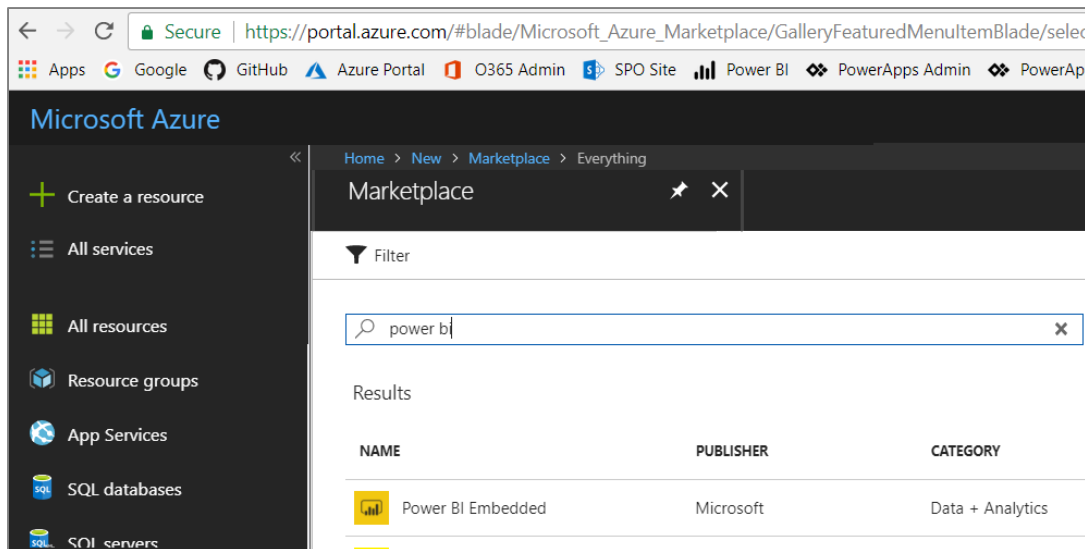

- App workspace moved into Premium capacity in Advanced settings

# Creating the Power BI Embedded Service

- Power BI Embedded in an Azure on-demand service
  - Must be created in same location as Power BI Service for tenant
  - Can be created manually through the Azure portal
  - Can be created in automated fashion using PowerShell
  - Requires an Azure subscription *in same tenant*

The screenshot shows the 'Power BI Embedded' creation form. The form includes fields for Resource name, Subscription, Resource group, Power BI capacity administrator, Location, and Pricing tier. The 'Create' button is highlighted in blue.

# Managing Power BI Embedded Capacities

- Managing Power BI Embedded capacity done Azure portal
  - Use Azure portal to assign administrators & change pricing tier to scale
- Managing Power BI Embedded capacity in Power BI Admin portal
  - Power BI Admin portal to assign workspaces to capacities

The screenshot displays the Power BI Admin portal interface. The top navigation bar includes the Power BI logo, 'Admin portal', and several utility icons. The left sidebar contains navigation options: Favorites, Recent, Apps, Shared with me, Workspaces, and My Workspace. The main content area is titled 'Admin portal' and features a list of settings on the left: Usage metrics, Users, Audit logs, Tenant settings, Capacity settings (highlighted), Embed Codes, and Organization visuals. On the right, there are tabs for 'Power BI Premium' and 'Power BI Embedded' (selected). Below the tabs is a table of capacities.

CAPACITY NAME	CAPACITY ADMINS	ACTIONS	SKU	REGION	STATUS
myfirstcapacity	Maxwell Smart, Ted Pattison		A1	West US 2	Active

Below the table, there is a link: [Set up new capacity in Azure](#).

# PBI Capacity SKU Decoder Ring

	P SKU	EM SKU	A SKU
Purchased through...	Office 365	Office 365	Azure
Supports Power BI embedding in custom applications	Yes	Yes	Yes
Supports 3 <sup>rd</sup> Party Embedding in custom applications	Yes	Yes	Yes
Supports 1 <sup>st</sup> Party Embedding in custom applications	Yes	Yes	Yes
Supports free users accessing content in Power BI portal	Yes	No	No
Supports free users accessing content in Power BI Mobile	Yes	No	No
Billing cycle	Monthly	Monthly	Hourly
Commitment	Monthly	Monthly/Yearly	None
Turn it off when your not using it	No	No	Yes

- Setting Up a Development Environment

# GitHub Repository for this Workshop

- <https://github.com/CriticalPathTraining/DPBIE>

The screenshot shows the GitHub repository page for CriticalPathTraining / DPBIE. The repository is described as "Student files for Developing with Power BI Embedding". It has 9 watchers, 10 stars, and 4 forks. The repository is on the master branch. The file list includes folders for Demos, DeveloperQuickStartSolution, Modules, PBIX, and Scripts, as well as files for .gitattributes, .gitignore, and 01-Developing with Power BI Embedding.pdf. The latest commit is 44c4e7c, made 12 minutes ago by TedPattison.

# Student Files

# Creating a Power BI Dev Environment

- Sign up for an Office 365 Enterprise E5 trial account
  - Creates a new Office 365 tenant
  - Creates an account which is tenant administrator
  - You can create 25 user accounts for testing purposes
  - Office 365 E5 provides Power BI Pro license

The screenshot shows the Microsoft Office 365 Enterprise E5 Trial sign-up page. At the top, there's an orange banner with the text "Office 365 Enterprise E5 Trial". To the right, there's a link "Sign in" and a speech bubble asking "Want to add this to an existing subscription?". The main heading is "Create your user ID". Below it, a message states: "You need a user ID and password to sign in to your account." The form consists of three input fields: a first name field containing "Student", a last name field containing "CptPowerBiTenant", and a domain dropdown menu showing ".onmicrosoft.com". Below these fields, the email address "Student@CptPowerBiTenant.onmicrosoft.com" is displayed with a green checkmark. There are two password fields, each with a masked password of eight dots. At the bottom, there's a link to "terms and conditions" and a "Create my account" button with a right-pointing arrow.

# Creating User Accounts for Testing

- Can be accomplished in Microsoft 365 Admin center
- Can be automated using PowerShell

```
CreateUserAccountsFromCSV.ps1 X
27
28 $mailNickname = $firstNameClean + $lastNameClean.SubString(0,1)
29 $userPrincipalName = $mailNickname + "@" + $classroomDomain
30
31 $password = "pass@word1"
32 $passwordProfile = New-Object -TypeName Microsoft.Open.AzureAD.Model.PasswordProfile
33 $passwordProfile.Password = $password
34 $passwordProfile.EnforceChangePasswordPolicy = $false
35 $passwordProfile.ForceChangePasswordNextLogin = $false
36
37 # Create new user account for student
38 $newUser = New-AzureADUser `
39     -DisplayName $displayName `
40     -GivenName $firstName `
41     -Surname $lastName `
42     -MailNickName $mailNickname `
43     -PasswordProfile $passwordProfile `
44     -PasswordPolicies "DisablePasswordExpiration, DisableStrongPassword" `
45     -UserPrincipalName $userPrincipalName `
46     -UsageLocation "US" `
47     -AccountEnabled $True
48
```

# Summary

- ✓ Power BI Embedding Fundamentals
- ✓ Understanding Workspaces and Capacities
